

MIS Global Training Center Presents:

5-DAY FUNDAMENTAL IMPLANTOLOGY COURSE FOR DOCTORS

Patient interest in dental implants is on the rise the world over; therefore dentists should be competent to offer this treatment as part of a comprehensive care package to their patients.

DESIGNED TO ANSWER YOUR NEEDS

- For clinicians not yet offering implant placement treatment to their patients, the curriculum has been developed to fill the gap between theory and practice.
- For GPs, periodontists, prosthodontists and oral surgeons with limited implant treatment practice, the course provides an opportunity to further develop implantology skills on a high level.

FOCUSED ON THE INDIVIDUAL

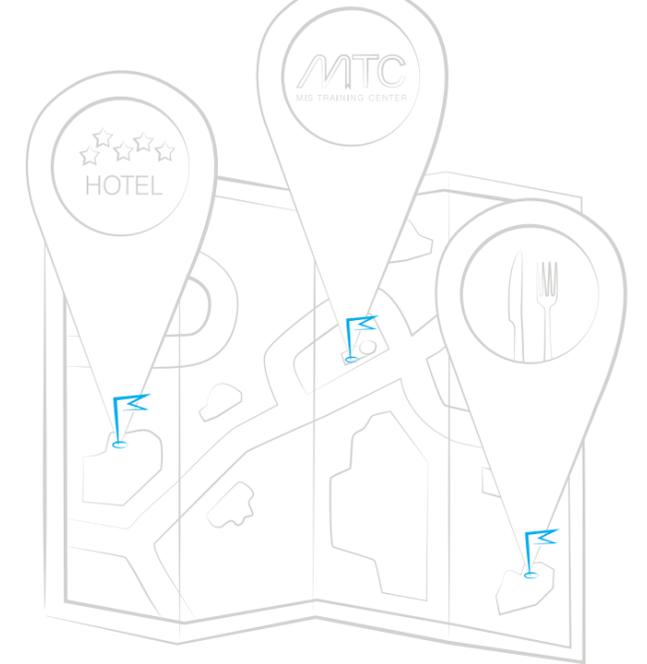

- Unlike large-scale training operations, this course is designed for a limited number of participants. It offers a small intensive forum which enables personal interaction with the presenters and important individual attention during workshops and discussions.
- Top-class lecturers provide a wealth of both academic and clinical experience, touching on practical issues that address doctor's everyday clinical needs. Attention is paid to each and every doctor, especially during hands-on sessions and discussions.
- Certificates and confirmation letters will be awarded upon completion of the course. Course confirmation letters may be used to apply for accreditation in your home country.

COURSE CURRICULUM FEATURES

Course participants gain proficiency in the latest technologies and protocols from top international authorities in implant dentistry at the MIS HQ conference facility. In addition, an on-site tour of the MIS production complex, and lectures plus tour at a leading university healthcare campus.

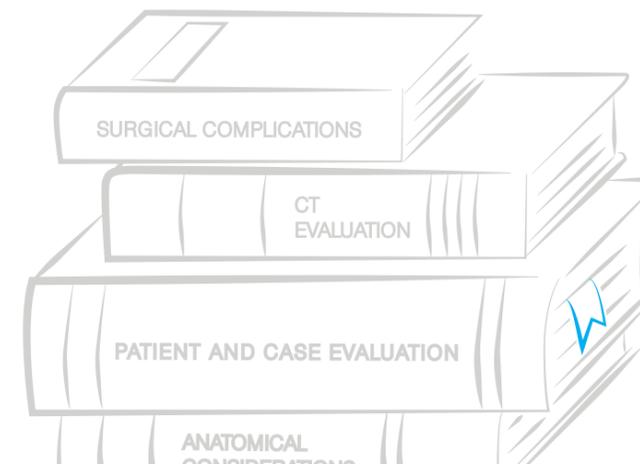

Lecture topics cover:

- Anatomical Considerations in Implant Dentistry
- Pre-surgical Implant Site Assessment; using different imaging modalities with an emphasis on computerized tomography (CT)
- Pre-surgical Assessment of the Compromised Patient in Implant Dentistry
- Treatment Planning for Implants in Anterior and Posterior Sites
- Implantation procedure - hands-on-model activities
- Protocols on Placement of Implants
- Implant Surface and Osseointegration
- Soft Tissue around Implants, Anatomy and Biology
- Surgical Complications
- Peri-implantitis
- Impression-Taking and Prosthetic Options in Implant Dentistry
- Temporary Restorations

RECREATION AND FUN

- An exciting 2-day sightseeing excursion led by experienced tour guides.
- 5-star hotel accommodations including valet transportation service.
- Outstanding food and drink at some of the very finest local establishments.

"It was a perfect course"

Dr. Cvete Pavlovski, Macedonia

"The organization and hospitality was superb"

Dr. Marios Kanaris, Cyprus

"The lectures and training sessions were first class"

Dr. Lev Grinberg, Netherlands
